TRACK
pro

TRACK pro

Benefon Track Pro is a state-of-the-art communication device with a combination of full-feature Dual Band GSM Phone, high-performance GPS receiver and Mobile Phone Telematics Protocol (MPTP). With MPTP and BeneGuard – a unique, easily programmable multifunction button – Benefon Track Pro can be configured for several different purposes, from easy-to-use safety device to mobile unit for resource management applications.

First to know the coordinates

First phone for locating and directing people

Benefon Track Pro is the world's first portable GSM phone that has hybrid positioning capabilities. Thanks to this, it can be used both to locate the phone users and to supervise and direct them to the desired positions. This way Benefon Track Pro increases the safety of the people and gives totally new opportunities for personnel management.

Fast help by pushing one button

Benefon Track Pro is a must for solitary workers and people at risk. With the help of MPTP, Benefon Track can easily be implemented for all emergency centers that can use voice and SMS for telematics. The center can be contacted in a second by pressing the BeneGuard button, either sending an SOS message or opening a voice connection to a predefined emergency number. All SOS messages show location, time, speed, direction and battery status.

New possibilities for resource management

With communication and positioning devices, telematic capabilities and full portability included in the same package, Benefon Track Pro makes most expensive resource management unnecessary. From now on, not only fleet but personnel such as service personnel, police and couriers can be managed with the same device.

Tough easy-to-use tool in pocket-size

Shock and water resistant Benefon Track Pro is designed for heavy use. Its practical design and elastomer protection on all sides give a good, firm grip, and the large keys can be used even with gloves on. The remarkable speaker phone system releases both hands for work and enables others to listen in on the conversation.

Full features for modern communication

As an advanced GSM phone, Benefon Track Pro comes with a phone book, calendar, appointment manager and alarm clock. It also enables access to e-mail and the Web via a PC with 14.4 kbps built-in GSM data and fax modem. By special order, Benefon Track Pro is also available as a co-branded version for the user company or organization.

Benefon Track Pro 1.1

GSM+GPS Professional Telematics Phone

Technical Data

CONSTRUCTION

- Glass fiber reinforced back cover
- Elastomer protected edges
- Splash proof
- Shock resistant

DIMENSIONS

- Weight: 185 g
- Length: 129 mm
- Width: 49 mm
- Thickness: 25 mm
- Volume: 132 cc³

WIRELESS NETWORK STANDARD

- GSM 900, GSM 1800, GSM 900/1800 Dual Band networks or GSM 900 and GSM 1900****

POSITIONING TECHNOLOGY

- Global Positioning System (GPS)
- Twelve-parallel-channel receiver continuously tracks and uses up to 12 satellites
- GSM network based positioning system (Network operator dependent)

DISPLAY

- Full graphics high-contrast screen
- Resolution 100 x 48 pixels
- Dynamic, user-selectable font size
- Up to 5 lines of text
- Graphical status indication and icons
- Graphical icons and scroll bars

KEYPAD AND EDITING

- Illumination
- Automatic and manual key lock
- ITU-T European Keypad printing
- Full screen cursor editor
- Clear last character or whole display
- International access (+) button
- One-touch T9 button
- Any-key answering

PERSONAL ORGANIZER

- Clock and date
- Alarm clock with snooze
- Calendar
- Calendar appointment manager, with reminders
- Phone power-on and off timers

OTHER PHONE FEATURES

- Vibrating Alert
- Predictive T9* text input for short messages and phone book
- Calculator
- Downloadable ringing melodies
- Precision GSM antenna RF connector for optimal performance and changing to optional antennas

CALL MANAGEMENT

- One-touch dialling
- Quick dialling
- Last or recent-numbers redial
- Multiparty calls
- Call waiting, call hold
- Call divert
- Calling number or name identification
- Caller number identification control
- Dialling prefix
- DTMF transmission
- Automatic and manual network selection
- Automatic answer with headset and car kit

BATTERIES

Type	Phone Weight	Stand-by op. time*	GSM Talk time	GPS operating time** Pro NT	Charging time
Lithium ion 900 mAh	164 g	55 - 150 h	2 h 30 min - 8 h	12 - 125 h	2 h
Lithium ion 1200 mAh	185 g	72 - 200 h	3 h 30 min - 10 h	17 - 170 h	3 h
Lithium ion 1700 mAh	183 g	100 - 280 h	4 h 30 min - 14 h	24 - 240 h	4 h

* Operating times can vary substantially depending on distance to base station, SIM card, temperature, network settings, network usage and GPS receiver operating mode.

** GPS operating time can vary substantially depending on power saving modes, satellite coverage and atmospheric conditions
