| Product description
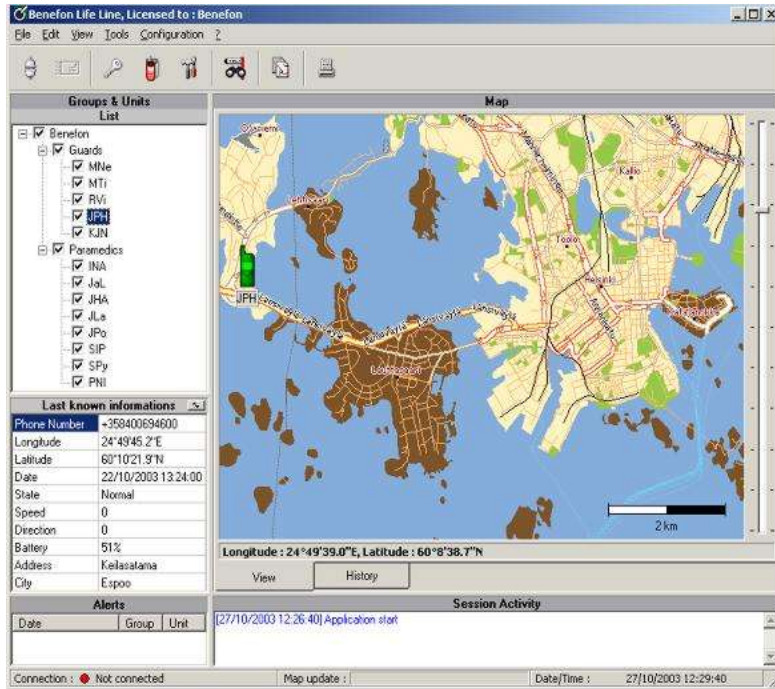

Benefon Life Line 3.0 consists of Benefon Life Line 3.0 tracking software, Benefon Mapware CD-ROM including a map of one country, a Benefon Track One instrument and Benefon Trackbox Portable functioning as a messaging center.

Benefon Life Line 3.0 has a complete set of components for establishing a service centre in customer premises.
- In emergency situations workers can send SOS-messages with their precise location to the service centre
- Emergency message shows up in the screen as a colour change in the phone icon on the map, alarm sound comes from the software and the program gives predefined alarm instrusctiond to the operating officer
- Service centre can request a worker's position by single position updates or by specified intervals

Benefon Life Line 3.0 is a scalable solution which can be extended to support up to 100 field units.
